About Urganch :

Urganch is a city in western Uzbekistan. It is the capital of the Khorezm Region. Khorezm, boasting very interesting and rich history, is one of the oldest Central Asian regions. The kingdom of Khorezm shahs was one of the world's largest in the 11th - 12th centuries. The region is part of Uzbekistan today, and the city of Urganch is its administrative center. Urganch has direct flights from Tashkent, travel time being 1 hour and is also connected by

Trains from Tashkent. Weather is cold in winters with average low temperature of -10 °C and summers average high temperatures being 35 °C. The arrival of the Trans-Caspian railway at the end of the 19th century made it viable as an international trading post, however, and during the Soviet era the city was heavily industrialised. The Soviets introduced cotton, motifs of which dominate the city, adorning everything from apartment blocks to street lights and in the autumn months the city empties into the surrounding cotton fields and cotton harvests monopolize local news. This cash crop remains the mainstay of the local economy to the present day. Modern Urganch is a Soviet-style city with cotton motifs adorning many objects, from street lights to apartment houses. Of note is a monument to the twenty Komsomol members killed by Tekke basmachi on the banks of the Syr Darya in 1922, and a large statue to Muhammad al-Khwarizmi, the 9th century local mathematician who revolutionised algebra, outside the Hotel Urganch. Urganch is the main gateway for tourists to Khiva 35 kilometres (22 mi) to the southeast, whose old city, known as Itchan Kala, is a UNESCO World Heritage Site.
