Population : 3.36 crore (2019 World Bank)

ABOUT UZBEKISTAN

Uzbekistan is located in the central part of Central Asia. It is bordered by Kyrgyzstan to the east, by Kazakhstan to the northeast, north, and north-west, Turkmenistan to the southwest and south, by Afghanistan to the south, and by Tajikistan to the southeast. The total length of the borders is about 5,300 km.

The northernmost boundary of Uzbekistan is located in the northeast Ustyurt plateau (45° 36' N), the southernmost The climate in Uzbekistan is continental, with hot summers and cool winters. The southern part of the country is the warmest and the northern part is the coldest. In summer temperature often exceeds 41°C (106°F), and can even reach 45°C (113°F) and above. Air humidity is not high. In winter temperature averages around -8°C (18°F), but can fall to -40°C (-40°F). Most of the country is also quite dry. Average annual precipitation range from 100 mm (3.9 in.) to 200 mm (7.9 in.) and mostly occurs in winter and spring. The boundary is near Termez city on the Amu Darya banks (37° 11' N), the westernmost boundary is on the Ustyurt plateau (56° E), and the easternmost boundary is in the east Fergana valley (73° 10' E).

ABOUT TASHKENT

Tashkent, historically known as Chach, is the capital and largest city of Uzbekistan. It is the most populous city in Central Asia. It is located in northeastern Uzbekistan, near the border with Kazakhstan. Today, as the capital of an independent Uzbekistan, Tashkent retains a multiethnic population, with ethnic Uzbeks as the majority. Tashkent is situated in a well-watered plain on the road between Samarkand, Uzbekistan's second city, and Shymkent across the border. Tashkent features a Mediterranean climate bordering a humid continental climate.

As a result, Tashkent experiences cold and often snowy winters not typically associated with most Mediterranean climates and long, hot and dry summers. Most precipitation occurs during winter, which frequently falls as snow. The city experiences two peaks of precipitation in the early winter and spring. Today Tashkent is the main economic and cultural centre of Central Asia. Cotton is the chief crop of the region in which it is situated. The city's numerous institutions of higher education and research establishments include the university, founded in 1920, and various institutes of the Uzbek Academy of Sciences, set up in 1943. Also notable is the Navoi Public Library.

The Tashkent Pediatric Medical Institute

The Tashkent Pediatric Academy, formerly known as Tashkent Pediatric Medical Institute, is a prestigious educational institution that has been providing top-notch pediatric education since its establishment in 1972. Located in the capital city of Uzbekistan, Tashkent, the academy has been a pioneer in the field of pediatric medicine in Central Asia. Over the past 46 years, Tashkent Pediatric Academy has prepared more than 29,500 highly qualified medical doctors who have made significant contributions to the healthcare sector in Uzbekistan and beyond. The academy has gained a reputation for its high-quality education, cutting-edge research, and clinical practice, making it one of the leading institutions in the region.
